

BLUE CREME DISHWASH

PRODUCT DESCRIPTION

A highly concentrated liquid detergent specially formulated for the manual washing of dishes, glassware, pots, pans and utensils, and for general cleaning.

This product is used at an economical ratio of 1 oz. per 4 gallons of water, even in the presence of heavy grease and food soil. Hand emollients are blended into the product to be mild to hands. It has fast soil penetration, excellent emulsification and soil suspension qualities. Saves time due to its fast soil removal properties. An effective detergent which cleans well even in very hard water. Economical to use as a little goes a long way. Truly a great product.

USE DIRECTIONS

Dishes, Glassware, Pots and Pans

1. Preflush and scrape all surface food soil.
2. Tank 1 - Wash in solution of 1 oz. per 6 gallons hot water.
3. Tank 2 - Rinse with clear water.
4. Tank 3 - Sanitize with an approved compatible sanitizer.
5. Place sanitized articles on a clean, sanitized surface and permit to air dry.
